sport-profi-hunting

www.dasta.cz

Dear customers,

Since 1992, **DASTA** is registered and protected trade mark and today this company is already traditional Czech producer. Its main activity is concentrated in development, production and sale of arm accessories – first of all nylon holsters for guns, accoutrement and accessories for armed forces together with accessories for hunters.

DASTA history begins in 1991 with origin of the physical persons association with the trade name Dana Staňková-DASTA with successful and very dynamic development from very origin. In 2004, this association has been transformed into new originated company **DASTA** s.r.o. taking over the whole production program with continuous development. In 2007 new modern premises were open in Prostějov – the town with a long time tradition in textile and tanning production of Moravian region.

The year 2024 is the year of the 33th anniversary of the company DASTA s.r.o.

At present time, company **DASTA** s.r.o. offers for its clients around 300 catalogue items. According to the complexity and production items, **DASTA** s.r.o. belongs already several years to the companies with the most comprehensive offer of this kind in the Czech Republic. Offer creates the whole production collection that is developed in a continuous and in such a way that it will satisfy the needs and requirements of the widest circle of users as from the civil sector so as from the armed forces.

Therefore, the company reserves its right to make such changes in the offer that lead to design, function characteristic improvement, or comfort increase in individual production items` use.

DASTA-sport involves collection of belt and tactical nylon holsters divided into several independent categories – and other arm accessories determined first of all for civil sector but also for armed forces - first of all for concealed gun carrying.

DASTA-profi involves duty belt and tactical holsters, complete accoutrement items and accessories determined for professional armed forces - first of all for Police, Prison and Customs Service but also for Community Police or civil security agencies. Users character and technical level of this category correspond with requirements determined for duty accessories and with the use in armed forces. Their quality is checked by many years use in armed forces of the Czech Republic and abroad. **DASTA** Ltd. and its members cooperate closely on their development with many professionals from armed forces, especially in the framework of IPA (International Police Association) membership.

DASTA-lov (hunting) involves basic hunting accessory and hunters items.

DASTA products are made from top domestic and foreign material incorporating health-safe substances only. Used material - together with modern way and production technology, together with many years experience of our workers in this area of production, are the guarantee of high quality, comfort and long years durability of the whole collection.

The **DASTA** s.r.o. company exports their products through both the direct clients abroad and the domestic business partners to more than 40 countries.

Distribution and sale of company DASTA s.r.o. products is realized in domestic market exclusively through agreement wholesale partners, or through direct products delivery into chosen retail shops in the whole Czech Republic. The manufacturer also provides direct sale of products to the armed forces. The company`s headquarters is not shop and company does not sell products to individual customers.

The **DASTA** s.r.o. company appreciates both foreign and domestic business partners and customers` continuing interests in **DASTA** branded products which makes it for further extension of our entire products offer by new product line that might be included in the catalogue.

Owing to the fact that the **DASTA** s.r.o. company releases their catalogues for a period of two years therefore new products shall be seen on www.dasta.cz website.

With kind regards

Karel Staněk

Notice for the users

DASTA products are made with the use of high technology and long-term knowledge in this area with following development trends not only in Europe but also in the world. Technical level and the usability of arm holsters, accoutrements, and accessories used in arm forces, fulfill the requirements for duty accessory.

Material and production technology

DASTA products are made from nylon water-repellent material having high resistance against chafing. Holsters for handguns are produced using "trilaminate" or "sandwich" technology. The "Trilaminate" is a double-side laminated foam epithelium "POLYFOAM" with upper material based on polyamide fibrous of "Cordura" type, and with inner material on a micro-velour basis. POLYFOAM is a foam epithelium with closed cell structure not absorbing water.

Sandwich is material with individual plies where the foam epithelium is replaced by the form permanent material with high density polyethylene PE 950 or PE 750 in different thickness and rigidity level – first of all for duty holsters, or for accessories. The inner material – based on a micro-velour, is usually laminated with 2 mm foam ply. Majority of material used for production has the ISO 9002 Certificate for quality check.

Treatment and products service

Products don't need any special treatment. Heavy dirt can be removed by brush and rubber wet out in common detergent. Holster can be then left to become dry in a temperature around 40 °C. Dirty Velcro fastener or the damaged press rivet closures can be removed. By duty holsters, where the removable screw caps are used, it is necessary to check on regular basis their firmness.

Assembling of arm holsters and accessories

DASTA products create complete collection and it allows to put together any duty belt or shoulder set according to the need. Shoulder set can contain vertical, horizontal, combined, or break-out shoulder holster and particular balance weights, or plastic standard or multi-function balance weight. Shoulder sets can be completed as one-side or both-sides sets with cross hinge KZ 40 or KZ 30 (width of belt in mm), with two one-shoulder belts or with net hinge. Combined shoulder holsters (and even belt holsters) and break-out holsters are for one side only.

Order number and the system of products marking

Order number (sometimes accompanied by capital letter) mentioned on identification product label in PET package, is composed of the following:

- three places number - producers number marking basic model
- number behind dash - modification of basic model – for gun holster means type of gun; for accessories it means different models or their size in one set (e.g. hand-cuffs holster, etc.);
- letters after slash mean the following:

„JRZ“	One Shoulder Hinge (for one-side holsters)
„JRZ-O“	One Shoulder Hinge (for ambidextrous holsters)
„KZ“	Cross Hinge
„TZ“	Standard tactical hinge
„TZ-B“	Tactical Hinge + wide cover flap
„PTZ“	Tactical plate choose type on page 28
„OZ“	Belt Rotating Loop
„Pd“	Padle
„S“	Steel Clip
„V“ (SZ)	VELCRO fastener
„p“	Accessories for knife UTON
„MS“	MOLLE SYSTEM
„B“	black
„G“	green
„BL“	blue
„GR“	grey
„C“	camo (camouflage)
„G/R“	green/rubber
„B/R“	black/rubber

Information for the users

All firearms if improperly and carelessly handled are potentially dangerous to life and health.

Before the use of the gun and the holster, we recommend to read these safety precautions carefully and observe the rules herein contained:

1. Use only the holster designed by the producer for the particular gun model (per designation on the label).
2. Use the holster in the way as recommended by the producer (as belt, shoulder or concealed holster). Concealed holsters are designed to be carried inside-the-pants in such a way that the clip of the holster catches the belt.
3. Try every new holster and by holstering take care that it goes smoothly and it doesn't come to any unwanted or inadvertent move or shifting of any part of the gun (hammer, slide, etc.).
4. Don't carry the gun in the holster with round in the chamber.
5. Always keep your finger OFF the trigger when drawing and holstering.
6. NEVER HOLSTER A COCKED HANDGUN.
7. Make the fastening of the holster by setting the VELCRO strap in an individual way according to the need (according to gun type) in such a way that the gun is firmly holstered in a secure way and protected against accidental loss. Riveted snap fasteners must be closed in a parallel way against each other (on the side closure but not on its back side).
8. Exchange any damaged riveted snap fasteners or Velcro straps if necessary.
9. Use securing strap with holsters having dual retention.
