DASTA - LOCK SPORT

830 DLS a 835 DLS for sport shooting

DLS DASTA LOCK-SPORT

- The holsters for sport shooting are made with short casing as model 830 DLS and long casing as model 835 DLS
- The gun is automatically secured inside the holster by spring-loaded component which has arcuate shape.
- To holstering your weapon into the case with the trigger guard between the two vertical segments of the lock, apply pressure from the top on the grip panel and the weapon is automatically secured inside the case at the trigger guard.
- DLS system secures the gun against falling out. Not against unauthorized removal of the gun.
- Speed Holsters are designed especially for competition purposes.
- The advantage of a Speed holster is that competitor may draw the handgun faster.
- All holsters model DLS are supplied with both types of belt harness - sport (SZ) and rotating (OZ).
